About Jorgenson

50 Years of Excellence

Where other manufacturers set limits, Jorgenson Lockers defies them with unlimited storage possibilities. With our expanded locker offerings, we are able to provide a greater variety of colors, sizes, materials and custom options so that our customers can truly take part in the design process.

Our decades of experience in the locker industry have allowed us to recognize the small differences that separate a good locker from an exceptional one. We have made it our mission to design and manufacture exclusive styles that break from the mold, by using years of customer feedback as our guide. The results have been enhanced efficiency and optimal performance in schools, gyms, warehouses, government facilities, offices and more.

Jorgenson Lockers offers the benefit of specialized customer support at all project stages, from planning phases to job completion. Together with our network of Jorgenson Locker distributors and product specialists located nationwide, we can assist with strategizing locker layouts, choosing the right products, providing installation resources and more.

Atlanta, GA Facility

Salt Lake City, UT Facility

Jorgenson Lockers is a family-owned business based in Salt Lake City, UT with over 50 years of experience in the locker industry. Driven by our passion for durable storage products, our aspiration as a manufacturer began with a desire to improve on traditional locker designs with modern enhancements. Our mission: lockers crafted with unique features, options and styles for specialized performance tailored to each industry. In 2015, we opened a second warehouse in Salt Lake City,

UT and a new east coast location in Atlanta, GA. Our new facilities have allowed us to better reach our growing customer base with an expanded offering of quick ship products and even faster delivery times. Whether locker needs require shipment in a matter of days—or strict specifications call for highly customized production—we have the products and services aligned to get you the right lockers, at the right time.

Strong on Service

Our team of experienced locker professionals are fluent in the layout, design and technical specifications of lockers. We work with customers, contractors and architects to achieve the most effective locker storage system based on dimensions, budget and application. Our skilled consultants are focused in bringing comprehensive locker solutions to facilities for long-term usability and reliable security.

Metal Lockers

An Overview

Jorgenson Lockers has been in the business of metal lockers for decades, offering well-made steel lockers that are designed to last for years. Schools nationwide have found better prices without compromising on quality through Jorgenson.

While schools have found that they can come to Jorgenson with any need, we also provide storage solutions for offices, warehouses, gyms, hospitals, military bases, fire departments and police stations. We are dedicated to fulfill any locker requirement, great or small.

Terms You'll See in This Catalog

GA: Steel Gauge. Specifies the thickness of the steel. The lower the number, the thicker the steel. The higher the number, the thinner the steel.

LH and RH: Left hand and Right hand side of a locker from a front-facing view.

Tier: The number of doors in a vertical row on a locker. Single tier = 1 door. Six tiers = 6 doors.

Opening & Frame: Opening is the compartment behind a door, while the frame is what holds the doors to the body of the locker.

W, D and H: Width, Depth and Height dimensions in inches.

Double Door: A locker equipped with 2 doors that open in the center.

KD: Knocked Down - Delivered unassembled for installation on site.

Metal Lockers

Construction Variations

Handles

Multi-Point Recessed Handle: A flush, stainless steel pan that is recessed into the locker face. Operates with an integral, finger-lift trigger.

Single Point Recessed Handle: Stainless steel pan that is recessed into the locker face. Accommodates a solid steel, single-point latch that inserts through a slanted slot in the handle. Operates with no moving parts.

Protruding Handle: Solid chrome, zinc-plated construction that is engaged through pull-out function with an internal latch bar.

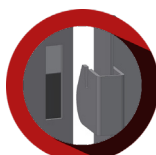

Friction Catch Pull Tab: A steel plate that is mounted on the inside of locker door with a pull tab inserted through a vertical slot.

Coin Operated: Uses an internal device that requires the insertion of coin fee into the coin slot and key turn to open. Available as coin return or coin collect with cash box.

Latches

Automatic Multi-Point Latch: Allows full engagement of latch mechanism through secure door closure. Fixed with nylon glides and latch hooks with rubber bumpers.

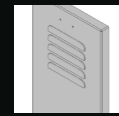

Slam Latch: Operates with a spring-loaded lift handle to achieve automatic closure. A hole in the lift handle is prepared for padlocks.

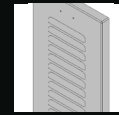

Single Point Latch: Used in conjunction with a stainless steel recessed handle, the padlock loop protrudes through a matching slot in the handle cup.

Friction Catch Door Pull: Utilizes the friction of door closure for latch engagement, features a protruding padlock hasp for finger pull entry.

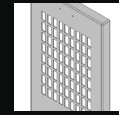

Standard Louvers: 3" or 6" wide ventilation slots located at the top and bottom of door.

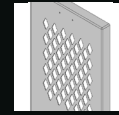

Full Louvers: Louvers that cover the full length of the door for increased air flow.

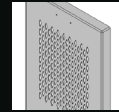

Mini Louvers: Also known as security vents, conceal locker contents and provide ventilation.

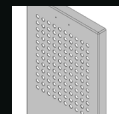

Visual Perforations: Rectangular perforations provide a high level of ventilation and visual inspection of locker contents.

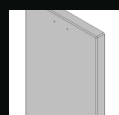

Diamond Perforations: Diamond-shaped perforations for maximum ventilation.

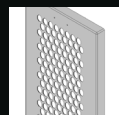

Mini Diamond Perforations: Smaller sized, diamond-shaped perforations for ample ventilation.

Round Perforations: Circular punches on side and back for increased air flow.

Solid Doors: Doors with a solid exterior for increased strength and quiet use.

Custom Perforations: Uniquely shaped perforations to match a personalized design.

Ventilation Options

Optional Heavy Duty Construction Handle

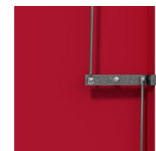

Cremone Multi-Point Handle:

Powerful steel handle welded to multi-latch system. Consists of 2 steel lock rods connected to locker frame. 3/8" rod engages top and bottom frame, 1/8" center bracket secures door to frame.

Signature Lockers

Metal Lockers

Quick Overview:

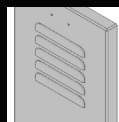

F Doors 16 GA.
Body 24 GA.

K Knocked down
or assembled

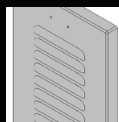

Jorgenson Signature is our quintessential standard locker and is well equipped for handling the stresses of daily use. Because of its exceptional versatility, the Signature is recommended for many basic storage applications. Signature Lockers offer 24 GA steel bodies with a solid, 16 GA steel door for ensuring durability. Doors shorter than 12" will have 18 GA doors. Smooth function is ensured with the addition of nylon glides and rubber bumpers on every door.

Lockers are finished in a durable, baked on powder coat available in 28 standard colors. Quick ship is available in 5 colors and select sizes. Signature models are available in single, double, triple and multi-tier, duplex, 2-person, wall mount and 16-person styles. Single tier comes standard with a hat shelf and steel hooks, styles up to triple tier feature steel hooks inside compartments. All styles include the option of 6" legs or without legs. Number plates included.

Signature Plus Lockers

Metal Lockers

Quick Overview:

Doors 14 GA.
Body 24 GA.

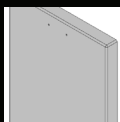

Knocked down
or assembled

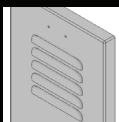

For rugged applications that are subject to rough handling or excessive use, Jorgenson Signature Plus offers a durable upgrade to meet tougher demands. Our Signature Plus lockers are ideal for hallways or corridors where impact and damage is likely to occur, they offer the same modern appearance as our standard Signature but with reinforced strength. Lockers are crafted with 24 GA steel bodies and the enhancement of a heavy-duty, 14 GA steel door.

Doors include nylon glides and rubber bumpers for quiet use. Lockers are finished in a durable, baked on powder coat that is available in 28 standard colors. Signature Plus is available in single, double and triple tier, 2-person and duplex styles. Single tier comes standard with a hat shelf and steel hooks, styles up to triple tier feature steel hooks inside compartments. All styles include the option of 6" legs or without legs. Number plates included.

Quick Overview:

Doors 16 GA.
Body 24 GA.

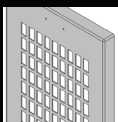

Knocked down
or assembled

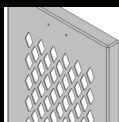

For everyday locker room environments, Jorgenson Ventilated provides essential air circulation and sturdy storage needed for students and patrons. Ventilated Lockers include 24 GA body construction with a rigid, 16 GA steel door for withstanding daily use. Doors come standard with rectangular-shaped perforations on door fronts for allowing visual inspection and consistent air flow. Doors include the addition of nylon glides and rubber bumpers for ensuring quiet use.

Lockers are finished in a durable, baked on powder coat available in 28 standard colors. Quick ship is available in 4 colors and select sizes. Ventilated Lockers are available in single, double, triple and multi-tier styles. Single tier comes standard with a hat shelf and steel hooks, styles up to triple tier feature steel hooks inside compartments. All styles include the option of 6" legs or without legs. Number plates included.

Athletic Lockers

Metal Lockers

Quick Overview:

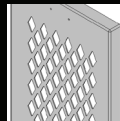

F Doors 14 GA.
Body 16 GA.

K Knocked down
or assembled

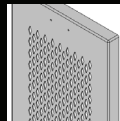

Jorgenson Athletic Lockers are built for intensive locker room applications where extra ruggedness is required. These sturdy lockers are engineered to handle excessive wear and tear with robust, 16 GA steel bodies and heavy-duty, 14 GA steel doors. Doors that are 15" wide and over 30" high are equipped with a 20 GA welded steel pan for additional stability and quiet use. Doors and sides feature diamond-shaped perforations for supplying a generous flow of ventilation.

Lockers are finished in a durable, baked on powder coat that is available in 28 standard colors. Quick ship is available in gray and select sizes. Athletic Lockers are available in single, double, triple and multi-tier styles. Single tier comes standard with a hat shelf and steel hooks, styles up to triple tier feature steel hooks inside compartments. All styles include the option of 6" legs or without legs. Number plates included.

All Welded Lockers

Metal Lockers

Quick Overview:

Doors 14 GA.
Body 16 GA.

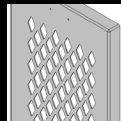

Fully Welded
Construction

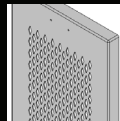

For high-strength locker capacities and extreme durability needs, Jorgenson All Welded Lockers are the superior choice. Ultra-rugged construction offers a robust, 14 GA steel door, 16 GA sides, tops and bottoms with an 18 GA back. All Welded Lockers deliver ample ventilation with diamond-shaped perforations on doors and sides. All components are securely welded to ensure complete rigidity and low-maintenance use. Doors that are 15" wide and over 30" high are equipped with

a 20 GA welded steel pan for additional support and quiet use. Doors operate with full-length continuous piano hinges. Lockers are finished in a durable, baked on powder coat that is available in 28 standard colors. All Welded Lockers are available in single, double, triple and multi-tier styles. Single tier comes standard with a hat shelf and steel hooks, styles up to triple tier feature steel hooks inside compartments. Welded lockers are factory assembled on-site. Number plates included.

Jorgenson Gladiator

Metal Lockers

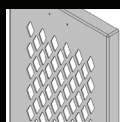

Quick Overview:

F Footlocker 14 GA. **K** Knocked down or assembled
S Security Box 14 GA.

Jorgenson Gladiator is our series of durable gear lockers designed exclusively for athletes, first responders and military personnel. Gladiator Lockers are constructed with the strength of 16 GA steel on tops, sides and bottoms and 18 GA on the backs. Lockers can also be upgraded to all welded construction for even greater resilience. Gladiator Lockers are available in 4 different configurations with a convenient, open front design for quick access. The Gladiators Series start with a base model

which includes a full-width shelf and a single, full-length compartment. These additional features are available in upgraded styles: full-width, heavy-duty coat rod, 14 GA pad-lockable footlocker with mini louvers and a 14 GA lockable security box. Gladiator models include our Large Gladiator Locker, Ball Storage Locker and Kids Gladiator Locker. Lockers are finished in a durable, baked on powder coat that is available in 28 standard colors. Quick ship is available in 4 colors and select sizes. Number plates included.

Jorgenson Wood Lockers

Wood Lockers

Quick Overview:

F Doors 5/8"
Body 5/8"

K Knocked down
or assembled

Jorgenson Wood Lockers provide a polished presentation with a distinct, wood grain finish. Our wood lockers are crafted with 5/8" industrial grade core and 0.03" plastic laminate or wood veneer construction, offering a durable, furniture-grade quality. Wood laminate provides many practical benefits including fire retardant, high pressure and moisture resistant properties for lasting, low maintenance use. Standard features include 20" extra deep compartments with coat rods. Doors are equipped with concealed

European hinges and door and radius edges are banded with PVC edge-banding. Door handles are a simple knob style with a padlock loop. Wood lockers are available in single, double, triple and multi-tier styles, 5 Tier Cell Phone Locker and Wood Sports Locker. Single tier comes standard with a hat shelf and steel hooks, styles up to triple tier and wood sports lockers feature steel hooks inside compartments. Wood lockers come in 4 finishes: natural, medium, dark and black wood.

Control Key No. 1970	0.1	1089

Built-in Key Locks: Only available in flat key or grooved key models. Spring bolt or dead bolt construction. Reversible for LH & RH functions.

Built-in Combination Locks: For added security, comes available with 5 combination changes year to year. Master Key controlled. For use with dead bolt models with the exception of box lockers, which would use a spring bolt.

Combination Padlocks: Available with or without Master Keying. 3 number dialing. Rust resistant. Will fit die-cast handles, recessed handles, cremone handles, basket racks and box lockers.

Coin Operated: Good option for public or private lockers that guarantees keys will be returned and/or as a revenue producer. Will fit most Jorgenson lockers. 3 types available: coin return, coin collect and token operation.

Locker Accessories

Benches

Benches & Pedestals

Jorgenson has different bench pedestal styles to choose from. Benches 96" long or less require two pedestals and benches that are over 96" long require three pedestals. ADA benches require a minimum of 4 pedestals on the seat.

Wood Bench Tops

Incredibly strong locker room benches finished with a clear lacquer.

ADA compliant benches use 16" or 18" deep backs and 20" or 24" deep bench seats with included brackets for providing support to backs. Pedestals will need to be ordered separately.

Anchored Bench Pedestals

A heavy duty 16-1/4" high steel tube is welded to the top and bottom flanges. Hardware for fastening to the bench is included. Must anchor pedestal to the floor. Two or more will be needed to be ordered per standard bench, whereas four or more for ADA compliant benches. Quick ship colors are gray, beige, black and red. Also available in 28 standard colors.

Stainless Steel Free Standing Pedestal

With a 14" wide base, this pedestal allows for movable free standing use. There are holes drilled into the bottom for optional floor anchoring or for attachment of non-skid bumpers. Bench top fastening hardware is provided. Pedestal height is 16-1/4".

Non-Skid Pedestal Kit for Stainless Steel Pedestal

Prevent damage to floors by using rubber non-skid bumpers. Comes with set of 4 non marking rubber feet and fastening hardware. Purchase 1 Kit per pedestal.

ADA Bench Bracket.

Used to attach 16" or 18" backrest to 20" or 24" deep benches. Heavy duty steel construction. Order a minimum of 2 per back. Bracket size is 19" x 19"x 2". Hardware included.

Locker Accessories

Bases

Individual Closed Bases

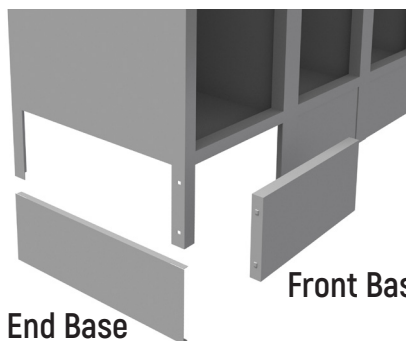

Designed to fit between 6" locker legs, front and end bases provide protection from dust and dirt getting under the locker. The metal is flush giving it a nice and clean look against the locker. Simply snap in the front bases and/or slip end base over legs during locker assembly. For knocked down locker w/ 6" legs only.

Locker Accessories

Top Options

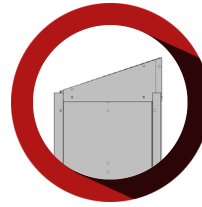

Top Options

Locker tops are available in 4 different options: flat tops, unit slope tops, slope top kits for groups of 1-wide and 3-wide lockers and continuous slope hoods. Choosing the right option for locker tops is important when considering maintenance needs. Flat locker tops are often utilized as an extra storage space which can lead to damage over time, they also require regular cleaning of dust and debris.

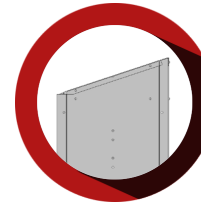

Flat Top

All lockers include standard flat tops with a level surface on the locker hood and can be used for additional storage.

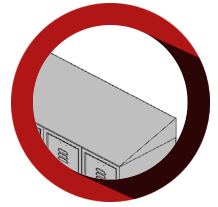

Slope Top Kits

Used for converting three locker frames of flat top lockers into slope tops. Includes a kit of 3 tops, 3 backs and 4 ends.

Unit Slope Tops

Used with single locker frames. Mitered top ends rise 1/3" of locker depth and discourage the use of locker tops for storage and eliminate dust accumulation.

Slope Hoods

Can be fitted onto a row of lockers with flat tops. Hood lengths measure 72" but must be cut to length when installing.

Slope Top Kits

*All lockers come standard with flat tops but can easily be converted into slope hoods with our slope top kits for modifying groups of 1 to 3-wide lockers. Slope top kits are available in multiple sizes, steel gauges and colors to match lockers. When converting longer rows of lockers, continuous slope hoods are recommended which are 72" long and can be cut to size during installation.

Soffit is to be constructed by general contractor. The face of soffit must be flush with locker face. Requires a 1" gap between top of locker and bottom of soffit. The recessed trim extends 3/8" from face of soffit.

Recessed Trim

When lockers are recessed into the wall and there's a gap between lockers and wall/soffits you'll need a recess trim (3" wide) to bridge that gap. Side trims for left hand (LH) and right hand sides (RH) are different. There are 3 types of side trim: 1) lockers with no legs, 2) with 6" legs, 3) for use with bottom recessed trim.

Locker Specifications

Signature Lockers & Signature Plus Lockers

Signature Lockers

Part 1: Product

1.01 Materials - All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint - All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish.

1.03 Construction - Lockers shall be constructed on the unit principle. Each locker is to have individual doors and frame, individual top, bottom, back, and shelves, with shared sides.

1.04 Doors - Doors shall be constructed from a single piece of 16 GA. steel with at least 3 louvers standard per door. The top and bottoms of the doors have flanges bent at 90°. Both the hinge and lock sides of the doors are bent twice to form a "C" channel.

- Doors that are 42" in height or longer will have an inner latch bar for an automatic, positive-type 3-point locking system.

- Doors less than 42" in height and longer than 18" will have an inner latch bar for an automatic, positive-type

2-point locking system.

- Doors that are 18" tall or shorter will have a friction catch pull tab with a padlock loop for a single-point latching system.

- Doors less than 12" tall use 18 GA. steel.

1.05 Door Frames - Frames Shall be formed from channel-shaped 16 GA. steel. The vertical pieces have an additional flange that adds strength and acts as a door strike. 2 and 3 tier lockers have an additional horizontal member between doors.

1.06 Door Handles - 22 GA. stainless steel recessed cup handles come standard on 1, 2, and 3 tier lockers. These handles feature a plastic molded ADA compliant lift handle. They can be fitted with all standard locker locks. Lockers with 4 or more tiers have a steel pull-tab handle with a padlock loop as well as pre-punched holes in the doors that are made to accommodate all standard locker locks.

1.07 Door Hinges - Two-inch-high 0.074 in thick sheet steel 5-knuckle hinges come standard. Hinges are projection welded to door frame and riveted to the door. Doors over 48" high use 3 or more hinges.

Doors over 24" wide use four hinges. All other doors use 2 hinges.

1.08 Locker Body - All body panels shall be

manufactured of powder-coated 24 GA. steel. All bolt/ rivet spacing is 9" O.C. or less.

1.09 Interior Equipment - Hooks are made of zinc-plated forged steel with ball ends.

- Single tier lockers have a hat shelf located 9" below the top of the locker. They have 3 wall hooks and 1 double hook hanging from the shelf. Lockers 18" deep or more have 3 wall hooks and a 1 coat rod.

- 2 tier lockers have 3 wall hooks and 1 double hook per compartment.

- 3 tier lockers have 3 wall hooks per compartment or 4 wall hooks in locker 15" wide or more.

- Lockers with 4 or more tiers have no hooks.

Part 2: Installation - Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Full Specifications can be found on jorgensonlockers.com

Signature Plus Lockers

Part 1: Product

1.01 Materials - All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint - All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish.

1.03 Construction - Lockers shall be constructed on the unit principle. Each locker is to have individual doors and frame, individual top, bottom, back, and shelves, with shared sides.

1.04 Doors - Doors shall be constructed from a single piece of 14 GA. steel. The top and bottoms of the doors have flanges bent at 90°. Both the hinge and lock sides of the doors are bent twice to form a "C" channel.

- Doors that are 42" in height or longer will have an inner latch bar for an automatic, positive-type 3-point locking system.

- Doors less than 42" in height will have an inner latch bar for an automatic, positive-type 2-point locking system.

1.05 Door Frames - Frames Shall be formed from channel-shaped 16 GA. steel. The vertical pieces have an additional flange that adds strength and acts as a door strike. 2 and 3 tier lockers have an additional horizontal member between doors.

1.06 Door Handles - 22 GA. stainless steel recessed cup handles come standard on all lockers. These handles feature a plastic molded ADA compliant lift handle. They can be fitted with all standard locker locks.

1.07 Door Hinges - Two-inch-high 0.074 in thick sheet steel 5-knuckle hinges come standard. Hinges are projection welded to door frame and riveted to the door. Doors over 48" high use 3 or more hinges. Doors over 24" wide use four hinges. All other doors use 2 hinges.

1.08 Locker Body - All body panels shall be manufactured of powder-coated 24 GA. steel. All bolt/ rivet spacing is 9" O.C. or less.

1.09 Interior Equipment - Hooks are made of zinc-plated forged steel with ball ends.

- Single tier lockers have a hat shelf located 9" below the top of the locker. They have 3 wall hooks and 1 double hook hanging from the shelf. Lockers 18" deep or more have 3 wall hooks and

a 1 coat rod.

- 2 and 3 tier lockers have 3 wall hooks per compartment or 4 wall hooks in locker 15" wide or more. 2 tier lockers have an additional double hook per compartment.

1.10 Number Plates - Each locker will have an aluminum number plate riveted to each door face.

1.11 Assembly - Locker components can be assembled with the use of rivets or flat headed bolts. Can be shipped unassembled or assembled.

Part 2: Installation - Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Full Specifications can be found on jorgensonlockers.com

Locker Specifications

Ventilated Lockers & Athletic Lockers

Ventilated Lockers

Part 1: Product

1.01 Materials – All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint – All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish.

1.03 Construction – Lockers shall be constructed on the unit principle. Each locker is to have individual doors and frame, individual top, bottom, back, and shelves, with shared sides.

1.04 Doors – Doors shall be constructed from a single piece of 16 GA. steel with a grid of rectangular perforations on the top and bottom of each door. The top and bottoms of the doors have flanges bent at 90°. Both the hinge and lock sides of the doors are bent twice to form a "C" channel.

- Doors that are 42" in height or longer will have an inner latch bar for an automatic, positive-type 3-point locking system.

- Doors less than 42" in height and longer than 18" will

have an inner latch bar for an automatic, positive-type 2-point locking system.

1.05 Door Frames – Frames shall be formed from channel-shaped 16 GA. steel. The vertical pieces have an additional flange that adds strength and acts as a door strike. 2 and 3 tier lockers have an additional horizontal member between doors.

1.06 Door Handles – 22 GA. stainless steel recessed cup handles come standard on 1, 2, and 3 tier lockers. These handles feature a plastic molded ADA compliant lift handle. They can be fitted with all standard locker locks. Lockers with 4 or more tiers have a steel pull-tab handle with a padlock loop as well as pre-punched holes in the doors that are made to accommodate all standard locker locks.

1.07 Door Hinges – Two-inch-high 0.074 in thick sheet steel 5-knuckle hinges come standard. Hinges are projection welded to door frame and riveted to the door. Doors over 48" high use 3 or more hinges. Doors over 24" wide use four hinges. All other doors use 2 hinges.

1.08 Locker Body – All body panels shall be manufactured of powder-coated 24 GA. steel. All bolt/rivet spacing is 9" O.C. or less.

1.09 Interior Equipment – Hooks are made of zinc-plated forged steel with ball ends.

- Single tier lockers have a hat shelf located 9" below the top of the locker. They have 3 wall hooks and 1 double hook hanging from the shelf. Lockers 18" deep or more have 3 wall hooks and a 1 coat rod.

- 2 and 3 tier lockers have 3 wall hooks per compartment or 4 wall hooks in locker 15" wide or more. 2 tier lockers have an additional double how per compartment.

1.10 Number Plates – Each locker will have an aluminum number plate riveted to each door face.

1.11 Assembly – Locker components can be assembled with the use of rivets or flat headed bolts. Can be shipped unassembled or assembled.

Part 2: Installation – Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Locker Specifications

All-Welded Lockers & Gladiator Lockers

All-Welded Lockers

Part 1: Product

1.01 Materials - All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint - All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish.

1.03 Construction - Lockers shall be constructed on the unit principle. Each locker is to have individual doors and frame, individual top, bottom, back, and shelves, with shared sides.

1.04 Doors - Doors shall be constructed from a single piece of 14 GA. steel. Doors can be flat or have a grid of diamond perforations. The top and bottoms of the doors have flanges bent at 90°. Both the hinge and lock sides of the doors are bent twice to form a "C" channel.

- Doors that are 42" in height or longer will have an inner latch bar for an automatic, positive-type 3-point locking system.

- Doors less than 42" in height and longer than 18" will

have an inner latch bar for an automatic, positive-type 2-point locking system.

1.05 Door Frames - Frames shall be formed from channel-shaped 16 GA. steel. The vertical pieces have an additional flange that adds strength and acts as a door strike. 2 and 3 tier lockers have an additional horizontal member between doors.

1.06 Door Handles - 22 GA. stainless steel recessed cup handles come standard on 1, 2, and 3 tier lockers. These handles feature a plastic molded ADA compliant lift handle. They can be fitted with all standard locker locks. Lockers with 4 or more tiers have a steel pull-tab handle with a padlock loop as well as pre-punched holes in the doors that are made to accommodate all standard locker locks.

1.07 Door Hinges - Continuous 0.074 in thick sheet steel hinges come standard. Hinges are welded to the door and frame.

1.08 Locker Body - All body panels shall be manufactured of powder-coated 16 GA. steel. All components are welded together. Locker sides can be flat or have diamond perforations.

1.09 Interior Equipment - Hooks are made of zinc-plated forged steel with ball ends.

- Single tier lockers have a hat shelf located 9" below the top of the locker. They have 3 wall hooks and 1 double hook hanging from the shelf. Lockers 18" deep or more have 3 wall hooks and a 1 coat rod.

- 2 and 3 tier lockers have 3 wall hooks per compartment or 4 wall hooks in locker 15" wide or more. 2 tier lockers have an additional double how per compartment.

- Lockers with 4 or more tiers have no hooks.

1.10 Number Plates - Each locker will have an aluminum number plate riveted to each door face.

1.11 Assembly - Lockers come per-assembled and welded in groups of 1 or 3.

1.12 Bases - All-welded lockers come with a 4" high "C" channel base welded to the bottom.

Part 2: Installation - Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Full Specifications can be found on jorgensonlockers.com

Gladiator Lockers

Part 1: Product

1.01 Materials - All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint - All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish.

1.03 Construction - Each locker is built as an individual unit and shares no parts with adjacent lockers (except for hoods and bases, if applicable).

1.04 Front Frames - Front frames shall be formed from channel-shaped 14 GA. steel.

1.05 Locker Body - All body panels except for locker backs shall be manufactured of powder-coated 16 GA. steel. Backs are made from 18 GA. steel. Sides include diamond-shaped perforations.

1.06 Interior Equipment - Lockers come standard with a top shelf, coat rod and 2 wall hooks. The following add-on options are also available depending on the model of locker.

- Lockable security box that goes on the top shelf.

- Lockable footlocker with horizontally hinged seat/footlocker door. Footlocker is made of 14 GA. steel.

- Ball storage retainer that consists of an elastic cord and a steel top, retaining bar.

- Additional shelves

1.07 Number Plates - Each locker will have an aluminum number plate riveted either to the face of the top shelf or the top of the footlocker door.

1.08 Assembly - Locker components can be assembled with the use of rivets or flat headed bolts. Can be shipped unassembled or assembled.

Part 2: Installation - Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Full Specifications can be found on jorgensonlockers.com

Locker Specifications

Cabinets & Wood Lockers

Cabinets

Part 1: Product

1.01 Materials - All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint - All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish.

1.03 Construction - Each cabinet is built as an individual unit and shares no parts with adjacent cabinets.

1.04 Doors - Doors shall be constructed from 22 GA. steel. The top and bottoms of the doors have flanges bent at 90°. Both the hinge and lock sides of the doors are bent twice to form a "C" channel. Doors include full-length stiffening pans.

1.05 Door Frames - Frames Shall be formed from channel-shaped 24 GA. steel.

1.06 Door Handles - Options include: L-handles and heavy duty cremone handles.

1.07 Door Hinges - Two-inch-high 0.074 in thick sheet steel 5-knuckle hinges come standard. Hinges are

projection welded to door frame and riveted to the door. Doors have 3 hinges each.

1.08 Cabinet Body - All body panels shall be manufactured of powder-coated 24 GA. steel. All bolt/ rivet spacing is 9" O.C. or less.

1.09 Interior Equipment - Shelves are adjustable to two-inch increment heights and can hold up to 180 lbs. The number and width of shelves depends on the model of cabinet.

- Storage Cabinets - 4 full-width shelves
- Combination Storage Cabinets - 1 (fixed-height) full-width shelf, 3 half-width shelves, and 1 half-width coat rod
- Wardrobe Storage Cabinets - 1 full-width shelf and 1 half-width coat rod

1.10 Assembly - Cabinet components can be assembled with the use of rivets or flat headed bolts. Can be shipped unassembled or assembled.

Full Specifications can be found on jorgensonlockers.com

Part 2: Installation - Cabinets shall be installed as outlined in the Jorgenson Lockers installation instructions. Cabinets should be correctly anchored and be plumb/level.

Wood Lockers

Part 1: Product

1.01 Materials - All wood parts shall be made of 5/8" composite wood particle core with .03" plastic laminate unless otherwise specified.

1.02 Finish - The Exterior side of the wood panels are finished with a plastic laminate made to look like natural wood. The interior side has a white, melamine finish. Exposed panel ends are finished with black PVC banding.

1.03 Construction - Lockers shall be constructed on the unit principle. Each locker is to have individual doors and frame, individual top, bottom, back, and shelves, with shared sides.

1.04 Doors - Doors shall be constructed from a single wood panel with an oval-shaped cutout for the door latch.

1.05 Door Handles - Steel "Performance Hasp" handles come standard.

1.06 Door Hinges - Doors use concealed, European-style hinges. 1 tier doors have 3 hinges each, while all other doors have 2 hinges each.

1.07 Locker Body - Locker body is manufactured from wood panels with a melamine finish on both sides. End panels can be purchased that have the wood veneer on 1 side of the panel.

1.08 Interior Equipment - Hooks are made of steel with 2 ball ends per hook.

- Single tier lockers have a hat shelf located 9" below the top of the locker. They have 2 wall hooks and 1 coat rod.
- 2 tier lockers have 2 wall hooks and 1 coat rod per compartment.
- 4 tier lockers have no hooks or rods.

1.09 Number Plates - Each locker will have an aluminum number plate riveted to each door face.

1.10 Assembly - Lockers come per-assembled in groups of 1 or 3.

Part 2: Installation - Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Full Specifications can be found on jorgensonlockers.com

Locker Specifications

Kids Lockers

Kids Lockers

Part 1: Product

1.01 Materials - All steel parts shall be made of commercial grade ASTM A1008 cold rolled sheet steel unless otherwise specified.

1.02 Paint - All painted parts shall be coated with a baked-on, electrostatically applied powder coat for a smooth, durable finish. Kid's Sports Lockers feature a black body and shelves and a colored door.

1.03 Construction - Lockers shall be constructed on the unit principle. Each locker is to have individual doors and frame, individual top, bottom, back, and shelves, with shared sides.

1.04 Doors - Doors shall be constructed from a single piece of 16 GA. steel. The top and bottoms of the doors have flanges bent at 90°. Both the hinge and lock sides of the doors are bent twice to form a "C" channel. Standard perforation styles vary by locker type.

- Large Kid's Locker - 6 louvers on both the top and bottom of each door.

- Kid's Sports Locker - Diamond perforations on top and bottom of each door.

- Locker with Cubbies - 6 louvers on the bottom of each door

- Kid's Mini Locker - 5 louvers on each door.

1.05 Door Frames - Frames Shall be formed from channel-shaped 24 GA. steel. The vertical pieces have an additional flange that adds strength and acts as a door strike.

1.06 Door Handles - 22 GA. stainless steel recessed cup handles come standard on 1, 2, and 3 tier lockers. These handles feature a plastic molded ADA compliant lift handle. They can be fitted with all standard locker locks. Lockers with 4 or more tiers have a steel pull-tab handle with a padlock loop as well as pre-punched holes in the doors that are made to accommodate all standard locker locks.

1.07 Door Hinges - Two-inch-high 0.074 in thick sheet steel 5-knuckle hinges come standard. Hinges are projection welded to door frame and riveted to the door. All doors use 2 hinges.

1.08 Locker Body - All body panels shall be manufactured of powder-coated 24 GA. steel. All bolt/rivet spacing is 9" O.C. or less. The sides on Kid's Stadium Lockers have diamond perforations.

1.09 Interior Equipment - Hooks are made of zinc-plated forged steel with ball ends. Indoor hardware varies by locker type.

- Large Kid's Locker and Kid's Sports Locker - hat shelf located 9" below the top of the locker. They have 2 wall hooks and 1 double hook hanging from the shelf.

- Kid's Gladiator Lockers - 1 shelf, 1 coat rod, 2 wall hooks, and 1 footlocker.

- Kid's Lockers with Cubbies and Kid's Mini Lockers have no hooks.

1.10 Number Plates - Each locker will have an aluminum number plate riveted to each door face. On Kid's Stadium Lockers, the number plate is attached to the front face of the shelf.

1.11 Assembly - Locker components can be assembled with the use of rivets or flat headed bolts. Can be shipped unassembled or assembled.

Part 2: Installation - Lockers shall be installed as outlined in the Jorgenson Lockers installation instructions. Lockers should be correctly anchored and be plumb/level.

Full Specifications can be found on jorgensonlockers.com

ADA Locker Guidelines

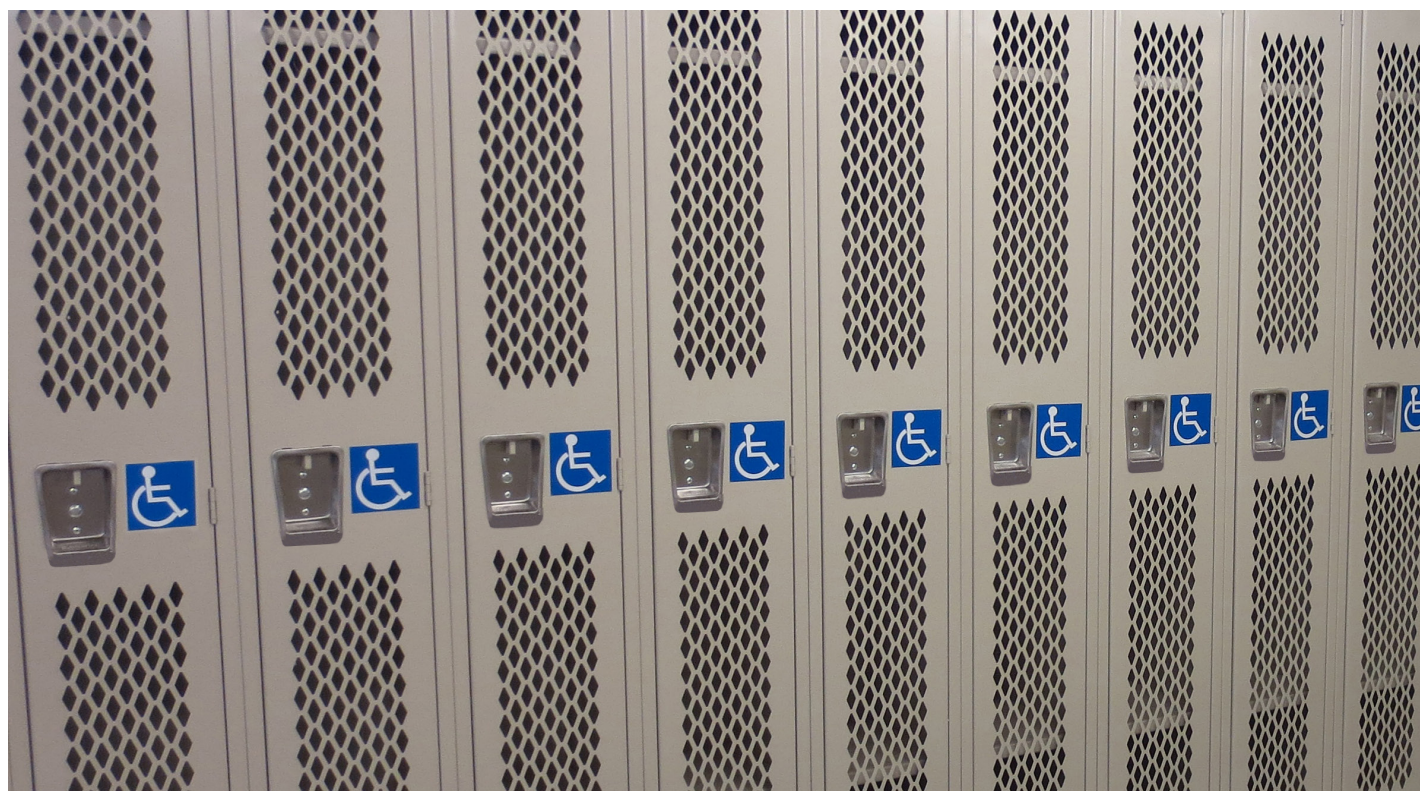

ADA requirements are:

- 60" or 72" single tier recessed handle lockers with 3 point latch and a shelf no higher than 48" from the ground level. (Field drilling for shelf location would be recommended.)
- Our 36" double tier locker with recessed handle and 2 point latch.

An additional shelf may be required at 15" from the finished floor. Properly adjusted recessed handles, cremone or box locker pull tab handles meet the criteria of taking less than 5 lbs. of force to operate without requiring user to twist, pinch or tightly grasp.

Other Requirements: Handicap sign may be required by the owner or architect (handicap decal part #8690). The architect should show the necessary clear open space in front of the selected lockers on drawings. 9-1/2 inch deep locker room benches currently don't meet the accessibility requirements. Larger seating surface (20-24" deep) and back support is also required, either by placing the bench back against a wall or attaching correctly sized backs.

For the most up to date information about barrier free requirements of all types, please contact the Americans with Disabilities Act section of the U.S. Department of Justice web site. (www.ada.gov)

Powder Coat (Standard)

Our high-performance powder coat paint is standard on all locker models and features an enduring, solid enamel that is baked on at 350-400 degrees. This coating is applied with precision quality for an even, polished finish that is highly resistant to scratches and cosmetic wear. With 28 different color variations we're certain you will find the perfect color to fit your needs.

 If you still need more color options than what you see here, please speak to a Jorgenson Lockers representative to see what we can do for you!

Two-Tone Colors

Two-Tone Colors provide the choice of contrasting color tones for a bold, eye-catching aesthetic. Door frames are painted one color while the locker body and parts are all painted another color.

***Let us know the secondary powder coat color you prefer in the order form notes.**

For example if you want Bubble Gum Pink as your door frame color and black as the body and parts color, select P408 and write "second color P412 black" in the order form notes section.
